

Notes on Creating a Frequency Table

• Steps to create a frequency table

① Choose intervals (like 1-5, 6-10, etc.)

② Record the values for each interval using tally marks for the numbers.

③ Find the frequency (# of tallies) for each interval

Ex. 22, 29, 18, 11, 23, 7, 8, 21, 15

Intervals	Tally	Frequency
1-10		2
11-20		3
21-30		4

*Note: Intervals must be the same size to be correct. * There must also be no overlap or gaps among numbers.
