# Notes on
Finding the Perimeter of any Polygon.

- A polygon is any closed figure with straight sides. It is 2-dimensional

| Polygons	Non-Polygons

To find the perimeter of any polygon, simply add up the measure of each side of the polygon.

Example	Example

$P = 2 + 5 + 2 + 5$
$P = 14 in.$

$P = 3 + 4 + 5$
$P = 12 mm.$

2 in   5 in

3 mm   5 mm   4 mm
